

Technical Data Sheet

Product: DT034

THE EDGE
ON SAFETY

DESCRIPTION

Floor finishing strip designed for transition between carpet and vinyl heights. This profile has a 3mm floor covering to carpet transition. Suitable for interior or exterior use, available in natural satin finish. This profile provides a tidy and hazard free transition between vinyl and carpet. This profile is the curved alternative to DT033.

MATERIAL

T6 6063 Alloy aluminium - Natural Satin anodised.

Standard 2.5 Meter Lengths.

DIMENSIONS

EXAMPLE

In this example the difference between DT033 and DT034 can be clearly seen. DT034 is fabricated slightly differently to allow the trim to be contoured on site to match a contoured floor within its specification details.

For PDF and CAD drawings with full dimensions and installation guides, please refer to our website www.tredsafe.co.nz

Release: January 2019

Information given in this data sheet is based on the current state of knowledge. This does not exempt the purchaser from carrying out his own careful inspections of incoming goods and their suitability for local building codes. We reserve the right to make changes to the product data in the course of technical progress or due to operationally related further development. Owing to factors beyond our control during application, recommendations given in this data sheet require tests and experiments by the customer. Our recommendations do not exempt the customer from the obligation to check any infringements of third-party rights himself and eliminate them if necessary. The suggestions for product use are not equivalent to a warranty of its suitability for the recommended purpose.

Each new release of this data sheet supersedes the previous one.
